

Course Evaluations -Student Assessment of Instruction – SAI's

Each course is linked to the SAI system. SAI's are completed online and are typically open around the last 3 weeks of the semester.

Due to the nature of the assessment being online – faculty are highly encouraged to tell their students to complete the assessments! It is best to have as high a completion rate as possible. The course instructor and Department Chair has access to SAI results. The Chair will review the results and provide feedback to the faculty member.
