Approved \_\_\_\_\_  
Date Dean, School of Graduate Studies

## COMPLIANCE AGREEMENT

### Permission to Use Images in Thesis/Dissertation

You should do your best to research and obtain images from the original source and read about their terms of use, or obtain images from databases such as [Creative Commons](#) or [Artsor](#) that provide proper citation information and license agreements. You should also do your best to gain permission for the use of images in your thesis or dissertation where copyright restrictions apply.

However, if you cannot gain permission and wish to use these particular images, you have a solid **Fair Use** argument because this is a scholarly work.

If you use images for which you cannot obtain permission, do your “due diligence” and follow the guidelines above and document your attempts to gain permission. Above all else, proper citation is required when using an image that you did not create yourself so as to not pass the work off as your own.

### What is "Fair Use"?

According to the U.S. Copyright Office's factsheet on Fair Use, the rights of copyright owners are subject to limitations. The doctrine of Fair Use allows users of copyrighted works to reproduce and reuse them in ways that are considered fair - such as criticism, comment, news reporting, teaching, scholarship, and research.

### The Four Factors

Section 107 of U.S. Copyright Law provides four factors to consider when considering whether the use of copyrighted works is a fair one:

1. The **purpose and character of the use**, including whether such use is of commercial nature or is for nonprofit educational purposes
2. The **nature of the copyrighted work** (e.g., whether it is factual or creative in nature)
3. The **amount and substantiality of the portion used** in relation to the copyrighted work as a whole
4. The **effect of the use upon the potential market** for or value of the copyrighted work

### Approval is Needed to Use Human Subjects in Research

How do I know if I need IRB approval? Submit form 129 to the IRB <https://www.etsu.edu/irb/forms.php>

Do not collect data before you have completed these steps and, if necessary, have acquired approval. NOTE: Human subjects private database use is also subject to IRB review.

### Approvals are Needed to Use Animals, Drugs, DNA, Radiation, and Hazardous Material in Research

Visit the Biosafety website for more information: <https://www.etsu.edu/research/biosafety/>
