Non-Accounting majors only. Course meets asynchronously online. Testing will be conducted live, on campus or at an approved proctoring site for those students located out of the region. Students will need to have a reliable computer and internet access to complete course requirements. For further information, contact the instructor. Preference will be given to students taking classes 100% online.

****BIOL 1010-900 is an ONLINE course offered through the ETSU Biological Sciences Department. THIS ONLINE COURSE INCLUDES BOTH LECTURE AND LAB. PLEASE DO NOT REGISTER FOR A SEPARATE LAB. Please contact Tobi Young at youngtl@etsu.edu to request a permit. Students will NOT be required to meet on campus or online at scheduled times. A distance learning laboratory kit is required, and it will be provided by your instructor at no extra charge. For minimum system computer requirements and additional information, please go here: https://www.etsu.edu/onlinehelp/student_help/tech_resources.php (you will need to copy/paste the link). Please be advised you will be responsible for watching/listening to lectures on D2L and completing assignments and assessments by the posted deadlines for each. You will be required to submit electronic photos of yourself performing the home-based lab exercises in order to receive full credit. Other requirements will be addressed by the instructor. Students wishing to attend a campus-based classroom section must enroll in a different section of BIOL 1010. Textbook required for the online BIOL1010 or BIOL1020 is different from the on-ground courses BIOL1010 or BIOL1020 courses. If you plan to use the same book, be advised to take both the courses as online or on-ground.**

"This will be discussion-based course where we will critically examine the primary scientific literature to learn the principles that make sound and impactful science. We will examine studies primarily conducted at the organismal level but we will emphasize the value of placing the results within a broader ecological and evolutionary framework. Students will be required to read the assigned papers, participate in discussions and prepare presentations"

This course, designed for all undergraduates, will give students essential knowledge for the ethical and informed use of Artificial Intelligence as it increasingly shapes academic disciplines, careers, and daily life. Multiple learning modules focused on AI literacy and ethics will prepare students to critically yet positively engage intelligent systems in their future. Contact Dr. Chelsie Dubay (dubayc@etsu.edu) for additional details.

Note: ENVH 4957 001 "Environmental Forensics" - The curriculum will consist of a series of case studies that are arranged to address environmental toxicology and health issues organized into several broad categories: Air quality, Water quality, Land use, Occupational health and safety, and Global effects of human activity. The cases will be designed to address environmental problems that are relevant to the Appalachian region and broadly across the United States, as well as globally. This course is open to all undergraduate and graduate students. Preference given to students within the College of Public Health. If you have ever wondered or wanted to explore more about the health of the environment, you are invited to take a journey with us!! For further information, please contact the department at (423) 439-5243.

For this hybrid course we will be combining in-person sessions with asynchronous online course delivery. Every Tuesday the instruction occurs on campus, in Lamb Hall classroom 303, and students are expected to come to the classroom for an in-person session. On Thursdays students will use the class time for asynchronous work. The asynchronous work will be on their own and consist of working through a guided exercise. Instructions for guided exercises will be provided in their corresponding week via D2L.

In this hybrid course, we will blend in-person classes with online learning that doesn't require real-time participation. Each Wednesday, you must attend a physical class in Lamb Hall classroom 315. On Fridays, you'll have online assignments to complete independently. These assignments will be in the form of guided exercises with instructions shared through D2L each week.

The course will explore theories of insurgency and counterinsurgency, review a number of successful and unsuccessful insurgencies and counterinsurgencies in history, and identify unique cultural factors that influence a nation's 'way of war'. We will examine multiple conflicts from ancient thru modern times to analyze the ways of war of insurgent movements and the operational practices and procedures of states and occupation forces to suppress them. We will use case studies to determine how 'national styles' evolve; how operations and techniques are influenced by transnational trends; and how insurgencies and counterinsurgencies succeed or fail. You will develop a theory about how a particular 'strategic culture' or 'national style' influences the approach to operations, how the approach affects the conduct and outcome of the operation, and whether changed approaches may have contributed to different outcomes. Finally, you will study several case studies to develop a theory of an "American Way of Counterinsurgency" and apply your theory to our 21st Century experience. Students will complete either two or four written essays or on topics of relevance to the course and to the student. There will be no midterm or final examinations.

HIST-3950-001	Military History:	14628	3	TR	08:35 AM	09:55 AM	A021	101	Class	DONNELLY	HIST	30	8	22	Y
---------------	-------------------	-------	---	----	----------	----------	------	-----	-------	----------	------	----	---	----	---

The course covers the military aspects of the period preceding the war (from 1870), the war itself (1914-1918), and the immediate aftermath (to 1920). The course focuses on military operations during the period 1914-1918. Students begin with an overview of the strategic environment and the political context for the military struggle. Students then receive an orientation to relative advantages and disadvantages of contemporary military organizations, tactics, equipment, technology, rank structures, and living conditions. Students will develop analysis tools based upon the Principles of War; use the tools to analyze the conduct of selected military operations from both perspectives; and use the results of the analysis to suggest lessons and improvements that would benefit future military operations. Students will complete four written essays identifying and analyzing critical events during sequential periods of the War. There will be no midterm or final examinations.

PSCI 4957-001 is titled African Politics. This course is an introduction to the politics of Sub-Saharan Africa, which includes the historical foundations of states in the region and contemporary issues involving conflict, economic development, and democratization. The course satisfies the comparative politics requirement for both the PSCI and INAF major.
